What is Plumbing Manufacturers International

Plumbing Manufacturers International (PMI) is the voice of the plumbing manufacturing industry, representing members who produce 90% of the plumbing products sold in the United States and have manufacturing operations at more than 70 locations across the country. These products, as well as hundreds of types of fixtures, fittings, valves, and piping contribute to water efficiency and water savings, sustainability, public health and safety, and a clean environment. These products and components are truly key to our nation's indoor plumbing systems.

Safe, responsible plumbing. Always.
